DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or make obvious the structure of claims 37-51, including, *inter-alia*, determining a pH gradient within a gastrointestinal tract by using two pH sensors within the tract, and using the gradient to determine a direction of flow over the distance separating the two sensors.

Rich (US Patent Application Publication 2002/0151816) discloses a method of determining a gradient in a patient's tract (paragraphs [0050] and [0083]) comprising inserting sensors separated by a distance within the tract (elements 12, figure 19); sampling the output of the sensors over time (paragraph [0071]); and determining a gradient between the output of the sensors over time (paragraph [0089]). Rich does not disclose inserting the sensors into a gastrointestinal tract, using pH sensors, or using the gradient to determine a direction of flow, especially since the gradient determined is a pressure gradient.

Kilcoyne (US Patent Application Publication 2004/0158138) discloses a method of generally monitoring the flow in a gastrointestinal tract (paragraph [0003]) using pH sensors (paragraph [0064]), in order to diagnose a patient's gastrointestinal reflux disease (GERD). However, Kilcoyne does not disclose using multiple sensors separated over a distance and determining a gradient of pH measurements over the distance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. Applicant's arguments, see request for continued examination, filed 18 January 2007, with respect to claims 37-51 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen E. Toth whose telephone number is 571-272-6824. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor, II can be reached on 571-272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
